Open to hearing about remote EU Front End Developer and Full Stack Developer positions.

## Skills

### Positions

Front End, Full Stack

### Experience level

Mid

### Core skills

JavaScript, React, PHP

### Other skills

Node.js, Typescript, Next

### Work eligibility

UK, EU

## Preferences

### Tech stack/Tooling

JavaScript, React, PHP

## Languages

English (fluent)

Polish (fluent)

French (beginner)

Spanish (beginner)

## Experience

### Technical Lead (Business Aviation), i6 Group

02/2023 - 07/2023 (6 months)

- I am accountable for its performance, which includes line managing and coaching three engineers.
- I provide technical leadership and guidance, regardless of the discipline, and actively work to ensure that all team members are on the same page; this includes facilitating clear communication between the Product Owner, the Customer, and other teams within the engineering group.
- I strive to ensure that all business, commercial and technical requirements are fully understood and taken into consideration when designing and developing the product.
- I proactively contribute to the planning process to help create strategies that will help the product achieve its goals in the most effective way possible.

### Full Stack Software Developer, i6 Group

07/2021 - 07/2023 (2 years 1 month)

I am accountable for the technical front end design, development, and implementation of the Business Aviation product, a comprehensive airport management solution. My responsibilities include:

- Taking ownership of the front-end codebase development to ensure its stability and growth using React, React Testing Library, and Jest.
- Collaborating closely with our COO, client, and multiple internal teams, including Integration, DevOps, and Infrastructure.
- Implementing the front-end PDQ machine payment integration using WebSocket.
- Contributing to both front-end and back-end codebases.

Stack:

- React
- NodeJS
- Typescript
- Legacy PHP (Symphony)

### PHP Junior Developer, i6 Group

10/2020 - 07/2021 (10 months)

Day-to-day stack:

- PHP 8 with Symfony 4 and MongoDB
- Twig/Mustache templates
- Testing with Behat, PHPUnit, Cypress
- Agile
- Git

What I do for growth:

- Picked up learning bits of React and successfully applied it in one of our product pages - eager to learn more!
- Picking up basics of NodeJS.
- Learning about the API-first design to participate in future improvements of our platform.

## Experience

### PHP Junior Developer, Substance

03/2019 - 10/2020 (1 year 8 months)

Web development using PHP (Vanilla, CodeIgniter framework), HTML, CSS, JavaScript.

Working on in-house developed product (<http://www.viewsapp.net/>) as well as external projects.

### Get into Tech Trainee, Sky

2019 - 2019 (3 months)

Excited to participate in 2019, 15-week course covering everything from current technology and trends to agile development, databases and commonly used languages like PHP, JavaScript, HTML and CSS.

### Scientific Experience, Various Companies

08/2015 - 09/2017 (2 years 2 months)

General BioTech experience I am very happy to chat about :)

03/2017 - 09/2017 Senior Assistant Scientist II at Charles River Labs

11/2016 - 02/2017 Scientist at Evotec

03/2016 - 11/2016 Analytical Scientist at Oxford BioMedica

04/2015 - 04/2016 Casual Research Assistant at McGill University, Canada

10/2013 - 08/2015 Research Scientist at Somru BioScience, Canada

## Education

### Université du Québec à Montréal

2014 - 2015 (1 year)

Francization and integration of immigrants

### Edinburgh Napier University

2011 - 2012 (1 year)

Master of Science (M.Sc.), Biomedical Sciences

### Agricultural University in Krakow

2007 - 2011 (4 years)

Bachelor of Science (Hons), Biotechnology
